WORK EXPERIENCE

Technology Analyst | Infosys Ltd | Richardson, TX

Jul 2022 – Nov 2024

- I facilitated the transition from Vendor to Business Partner by enhancing Web Dynpro Application and leveraged the Object Oriented functionality, which led to improvement in process accuracy and smoother business interactions.
- I delivered impactful Power BI reports by integrating SSAS cubes and HANA calculation views, which significantly improved data accessibility and decision-making capabilities.
- I optimized project delivery by collaborating with end-users, consultants, and stakeholders to define and address requirements, gather technical requirements and create technical design documents, resulting in effective development of solutions and swift resolution of issue, ensuring smooth operational continuity.

Consultant | Deloitte Consulting | Bengaluru, India

May 2021 – April 2022

- I improved SAP SD Pricing functionalities for Purchase and Sales Orders by implementing Object-Oriented ABAP solutions which enhanced pricing precision and order handling efficiency.
- I enhanced system functionality by creating CDS views, OData services, Adobe forms, and reports, which streamlined data access, improved user interfaces, and more effective reporting capabilities.

Technology Analyst | Infosys Ltd | Pune, India

Oct 2017 – May 2021

- I optimized return management by developing OData services for a FIORI app, resulting in a more effective Return Order application and enhanced operational efficiency.
- I supported the project team for accurate tax reporting and invoice processing implementing changes to Adobe forms and adjusting related reports and interfaces for tax collected at source.
- I leveraged the KANBAN methodology to track and resolve incidents and priority issues, resulting in improved workflow efficiency and quicker issue resolution.

Associate Consultant | Capgemini Technology | Mumbai, India

Feb 2015 – Oct 2017

- I designed and implemented labels using ZEBRA and Loftware designers, developed Smartforms, and created driver programs for logic, improving label functionality and consistency.
- I designed and developed object oriented ALV reports, while making the code more extensible and reusable, to display Joint Venture Accounting details on the HANA database, resulting in enhanced data visibility and more insightful financial reporting.
- I streamlined legacy system data migration to SAP by leveraging BDC Recording and enhanced BAPI functionality with custom fields to meet specific criteria, ensuring precise and effective integration.

EDUCATION

BE in Computer Science, Nagpur University, India

2010 – 2014
